INDEPENDENT AUDITORS' REPORT

To the Shareholders of Squire Mining Ltd.,

We have audited the accompanying financial statements of Squire Mining Ltd., which comprise the statements of financial position as at October 31, 2015, and 2014 and the statements of loss and comprehensive loss, cash flows and changes in shareholders' equity (deficiency) for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Squire Mining Ltd. as at October 31, 2015, and 2014 and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 2 in the financial statements which indicates that the Company has limited working capital, no current sources of revenue and is dependent upon its ability to secure new sources of financing. These conditions, along with other matters as set forth in Note 2, indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

SQUIRE MINING LTD.

NOTES TO THE FINANCIAL STATEMENTS

October 31, 2015 and 2014 (Stated in Canadian Dollars)

Note 1 Nature of Operations

The Company is a mineral property exploration company whose common shares trade on the Canadian Securities Exchange ("CSE"). On March 18, 2015, the Company received a receipt from the BCSC, ASC and OSC for its initial public offering ("IPO") dated March 17, 2015 and become a reporting issuer in British Columbia, Alberta and Ontario. On June 12, 2015, the Company completed its IPO and commenced trading on June 16, 2015 under the trading symbol "SQR".

The Company has an option agreement to earn an interest in a mineral property located near Quesnel, British Columbia (Note 5) and has not yet determined whether this property contains reserves that are economically recoverable. The recoverability of amounts from the property is dependent upon the discovery of economically recoverable reserves, confirmation of the Company's interest in the underlying property, the ability of the Company to obtain necessary financing to satisfy the expenditure requirements under the property option agreement and to complete the development of the property and upon future profitable production or proceeds for the sale thereof.

Squire Mining Ltd. (the "Company") was incorporated under the Business Corporations Act (British Columbia) on March 23, 2011. On January 13, 2015 the Company changed its name from 0906251 B.C. Ltd. to Squire Mining Ltd.

The address of the Company's corporate office and principal place of business is c/o Suite 404 – 815 Hornby Street, Vancouver, BC, V6Z 2E6 and the address of its records office is Suite 650 – 1188 West Georgia Street, Vancouver, BC, V6E 4A2.

Note 2 Basis of Preparation

a) Statement of Compliance

These financial statements, including comparatives, have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and Interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC").

The financial statements were authorized for issue by the Board of Directors on February 1, 2016.

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 2

Note 2 <u>Basis of Preparation</u> – (cont'd)

b) Going Concern

The Company has not generated revenue from operations and incurred a net loss of \$132,085 for the year ended October 31, 2015, has accumulated a deficit at October 31, 2015 of \$163,933 and expects to incur further losses in the development of its business. These financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The Company has not yet determined whether its mineral properties contain economically recoverable reserves. The recoverability of the amounts shown for mineral properties is dependent upon the confirmation of economically recoverable reserves and its ability to obtain adequate financing to develop its mineral properties, and to commence profitable operations in the future, all of which casts significant doubt about the Company's ability to continue as a going concern.

These financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

c) Basis of Measurement

These financial statements have been prepared using the historical cost basis in Canadian dollars, which is the Company's functional currency.

The preparation of financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgement in applying the Company's accounting policies. The areas involving higher degree of judgement of complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 4.

Note 3 Significant Accounting Policies

The accounting policies set out below have been applied consistently to all years presented in these financial statements unless otherwise indicated.

a) Cash and Cash Equivalents

Cash and cash equivalents consist of highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and subject to an insignificant risk of change in value.

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 3

Note 3 <u>Significant Accounting Policies</u> – (cont'd)

b) Basic and Diluted Loss per Share

Basic earnings per share are computed by dividing the loss for the period by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflect the potential dilution that could occur if potentially dilutive securities were exercised or converted to common stock. The dilutive effect of options and warrants and their equivalent is computed by application of the treasury stock method and the effect of convertible securities by the "if converted" method. Diluted amounts are not presented when the effect of the computations are anti-dilutive due to the losses incurred. Accordingly, there is no difference in the amounts presented for basic and diluted loss per share.

c) Exploration and Evaluation Assets

Pre-exploration costs

Pre-exploration costs are expensed in the year in which they are incurred.

Exploration and evaluation costs

Once the legal right to explore a property has been acquired, exploration and evaluation expenditures are recognized and capitalized in addition to the acquisition costs. Mineral exploration costs are capitalized on an individual prospect basis until such time as an economic ore body is defined or the prospect is abandoned. Once the technical feasibility and commercial viability of extraction of the mineral resources has been determined, the property is considered to be a property under development and is reclassified as such. Accordingly, costs for a producing prospect are amortized on a unit-of-production method based on the estimated life of the ore reserves, while those costs for prospects abandoned are written off.

On an annual basis or when impairment indicators arise, the Company evaluates the future recoverability of its exploration and evaluation costs. Impairment losses or write-downs are recorded in the event the net book value of such assets exceeds the estimated indicated future cash flows attributable to such assets.

The recoverability of the amounts capitalized for the undeveloped exploration and evaluation assets is dependent upon the determination of economically recoverable ore reserves, confirmation of the Company's interest in the underlying mineral claims, the ability to obtain the necessary financing to complete their development, and future profitable production or proceeds from the disposition thereof.

Title to mineral properties involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyance history characteristic of many mineral properties. The Company has investigated title to its exploration and evaluation assets and, to the best of its knowledge, the title to its property is in good standing.

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 4

Note 3 <u>Significant Accounting Policies</u> – (cont'd)

c) Exploration and Evaluation Assets – (cont'd)

Management's capitalization of exploration and development costs and assumptions regarding the future recoverability of such costs are subject to significant estimation uncertainty. Management's assessment of recoverability is based on, among other things, the Company's estimate of current mineral reserves and resources which are supported by geological estimates, estimated commodity prices, and the procurement of all necessary regulatory permits and approvals. These assumptions and estimates could change in the future and this could materially affect the carrying value and the ultimate recoverability of the amounts recorded for mineral properties.

Mineral exploration tax credits are recorded in the accounts when there is reasonable assurance that the Company has complied with, and will continue to comply with, all conditions needed to obtain the credits. These non-repayable mineral tax credits are earned in respect to exploration costs incurred in British Columbia, Canada and are recorded as a reduction of the related deferred exploration expenditures.

d) Impairment of Long-lived Assets

The Company's tangible and intangible assets are reviewed for an indication of impairment at each financial position date. If indication of impairment exists, the asset's recoverable amount is estimated.

An impairment loss is recognized when the carrying amount of an asset, or its cash-generating unit, exceeds its recoverable amount. A cash-generating unit is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. Impairment losses are recognized in the statement of comprehensive loss when incurred. Impairment losses recognized in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to cash-generating units and then to reduce the carrying amount of the other assets in the unit on a pro-rata basis.

The recoverable amount is the greater of the asset's fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss is reversed if there is an indication that there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized. An impairment loss with respect to goodwill is never reversed.

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 5

Note 3 <u>Significant Accounting Policies</u> – (cont'd)

e) Rehabilitation Provisions

The Company recognizes liabilities for statutory, contractual, constructive or legal obligations associated with the retirement of tangible long-lived assets, when those obligations result from the acquisition, construction, development or normal operation of the assets. The net present value of future rehabilitation cost estimates is capitalized to the amount of the related asset along with a corresponding increase in the rehabilitation provision in the period incurred. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value. The rehabilitation asset is depreciated on the same basis as the related asset. The liability is progressively increased each period as the effect of the discounting unwinds, creating an expense recognition in the statement of comprehensive loss.

The Company's estimates of reclamation costs could change as a result of changes in regulatory requirements and assumptions regarding the amount and timing of the future expenditures. These changes are recorded directly to the related asset with a corresponding entry to the rehabilitation provision.

The Company's estimates are reviewed at each reporting date for changes in regulatory requirements, effects of inflation and changes in estimates. Changes in the net present value, excluding changes in the Company's estimates of reclamation costs, are charged to the statement of comprehensive loss for the period. As at October 31, 2015, the Company is not aware of any reclamation costs and no amounts have been recorded.

f) Share Capital

Financial instruments issued by the Company are classified as equity only to the extent that they do not meet the definition of a financial liability or financial asset. The Company's common shares, share warrants and flow-through shares are classified as equity instruments.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Flow-through Shares

The Company will, from time to time, issue flow-through shares to finance a significant portion of its exploration program. Pursuant to the terms of the flow-through share agreements, these shares transfer the tax deductibility of qualifying resource expenditures to investors. On the issuance of a flow-through share, it is bifurcated into equity (share) and liability (flow-through) components on the issue date. Upon expenditures being incurred, the Company derecognizes the liability and recognizes a deferred tax liability for the amount of tax reduction renounced to the shareholders. The premium is recognized as other income and the related deferred tax is recognized as a tax provision.

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 6

Note 3 <u>Significant Accounting Policies</u> – (cont'd)

f) Share Capital – (cont'd)

Proceeds received from the issuance of flow-through shares are restricted to be used only for Canadian resource property exploration expenditures within a two-year period.

The Company may also be subject to a Part XII.6 tax on flow-through proceeds renounced under the Look-back Rule, in accordance with Government of Canada flow-through regulations. When applicable, this tax is accrued as a financial expense until paid.

g) Share-based Payments

Equity-settled share based payments for directors, officers and employees are measured at fair value at the date of grant and recorded as compensation expense in the financial statements. The fair value determined at the grant date of the equity-settled share based payments is expensed using the graded vesting method over the vesting period based on the Company's estimate of shares that will eventually vest. Where the terms and conditions of options are modified before they vest, the increase in the fair value of the options, measured immediately before and after the modification, is also charged to the statement of comprehensive loss over the remaining vesting period.

Compensation expense on share purchase options granted to non-employees is measured at the earlier of the completion of performance and the date the options are vested using the fair value method and is recorded as an expense in the same period as if the Company had paid cash for the goods or services received.

When the value of goods or services received in exchange for the share-based payment cannot be reliably estimated, the fair value is measured by use of a Black-Scholes valuation model. The expected life used in the model is adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions, and behavioural considerations.

All equity-settled share based payments are reflected in contributed surplus, until exercised. Upon exercise, shares are issued from treasury and the amount reflected in contributed surplus is credited to share capital along with any consideration paid. If the options expire unexercised, the amount recorded remains in contributed surplus.

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 7

Note 3 <u>Significant Accounting Policies</u> – (cont'd)

g) Share-based Payments – (cont'd)

Where a grant of options is cancelled or settled during the vesting period, excluding forfeitures when vesting conditions are not satisfied, the Company immediately accounts for the cancellation as an acceleration of vesting and recognizes the amount that otherwise would have been recognized for services received over the remainder of the vesting period. Any payment made to the employee on the cancellation is accounted for as the repurchase of an equity interest except to the extent the payment exceeds the fair value of the equity instrument granted, measured at the repurchase date. Any such excess is recognized as an expense.

h) Income Taxes

Income tax expense is comprised of current and deferred tax. Current and deferred income tax is recognized in the statement of consolidated loss except to the extent that it relates to a business combination or items recognized directly in equity or other comprehensive income, in which case the income tax is also recognized directly in equity or other comprehensive income.

Current income taxes are the expected tax payable on the taxable income for the year, using tax rates enacted, or substantively enacted, at the end of the reporting period, and any adjustment to tax payable in respect of previous years.

Deferred tax assets and liabilities are recognized in respect of all qualifying temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined on a non-discounted basis using tax rates and laws that have been enacted or substantively enacted at the financial position date and are expected to apply when the deferred tax asset or liability is settled. Deferred tax assets are recognized to the extent that it is probable that the assets can be recovered.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

Deferred income tax assets and liabilities are presented as non-current.

i) Financial Instruments

Financial assets and liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets are derecognized when the rights to receive cash flows from the assets have expired or have been transferred and the company has transferred substantially all risks and rewards of ownership. Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 8

Note 3 <u>Significant Accounting Policies</u> – (cont'd)

i) Financial Instruments – (cont'd)

At initial recognition, the Company classifies its financial assets in the following categories depending on the purpose for which the instruments were acquired.

Financial assets are classified into one of four categories: financial assets at fair value through profit or loss ("FVTPL"), held-to-maturity investments, available for sale ("AFS") financial assets and loans and receivables.

The Company has classified cash and cash equivalents and amounts receivable as loans and receivables.

At each reporting date, the Company assesses whether there is objective evidence that a financial asset is impaired. Financial assets are impaired when one or more events that occurred after the initial recognition of the financial asset have been impacted.

For financial assets carried at amortized cost, the amount of the impairment is the difference between the asset's carrying amount and the present value of the estimated future cash flows, discounted at the financial asset's original effective interest rate.

The carrying amount of all financial assets, excluding trade receivables, is directly reduced by the impairment loss. The carrying amount of a trade receivable is reduced through the use of an allowance. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in the statement of comprehensive loss.

Impairment losses on loans and receivables carried at amortized cost are reversed in subsequent periods if the amount of the loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized. Impairment losses on available-for-sale equity instruments are not reversed.

Financial liabilities within the scope of IAS 39 are classified as financial liabilities at FVTPL, or other financial liabilities, as appropriate.

The Company determines the classification of its financial liabilities at initial recognition. All financial liabilities are recognized initially at fair value.

The Company's financial liabilities include accounts payables and accrued liabilities and amounts due to related parties. Subsequent to initial recognition, financial liabilities are measured at amortized cost using the effective interest method.

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 9

Note 3 <u>Significant Accounting Policies</u> – (cont'd)

j) Accounting standards and amendments issued not yet effective

The following new standards and interpretations are not yet effective and have not been applied in preparing these financial statements. The Company is currently evaluating the potential impacts of these new standards; however, the Company does not expect them to have a significant effect on the financial statements.

- IFRS 9, Financial Instruments (effective January 1, 2018) introduces new requirements for the classification and measurement of financial assets, and will replace IAS 39. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple classification options available in IAS 39.
- IFRS 15 Revenue from Contracts with Customers provides a single principle-based framework to be applied to all contracts with customers. IFRS 15 replaces the previous revenue standard IAS 18, Revenue, and the related Interpretations on revenue recognition. The standard scopes out contracts that are considered to be lease contracts, insurance contracts and financial instruments. The new standard is a control-based model as compared to the existing revenue standard which is primarily focused on risks and rewards. Under the new standard, revenue is recognized when a customer obtains control of a good or service. Transfer of control occurs when the customer has the ability to direct the use of and obtain the benefits of the good or service. This standard is effective for reporting periods beginning on or after January 1, 2017.

Note 4 Use of Estimates and Judgments

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Information about critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements is included in the following notes:

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 10

Note 4 <u>Use of Estimates and Judgments</u> – (cont'd)

i) Exploration and evaluation expenditure

The carrying value and the recoverability of exploration and evaluation assets, which are included in the statements of financial position, utilize the cost model and the carrying value of the exploration and evaluation assets is based on the expenditures incurred. Management regularly tests for recoverability whenever events or changes in circumstances indicate that its carrying amount may not be recoverable. Impairment of exploration and evaluation assets is generally considered to have occurred if one of the following factors are present: the rights to explore have expired or are near to expiry with no expectation of renewal, no further substantive expenditures are planned, exploration and evaluation work is discontinued in an area for which commercially viable quantities have not been discovered, indications in an area with development likely to proceed that the carrying amount is unlikely to be recovered in full by development or by sale.

ii) Income taxes

Significant judgment is required in determining the provision for income taxes. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Company recognizes liabilities and contingencies for anticipated tax audit issues based on the Company's current understanding of the tax law. For matters where it is probable that an adjustment will be made, the Company records its best estimate of the tax liability including the related interest and penalties in the current tax provision. Management believes they have adequately provided for the probable outcome of these matters; however, the final outcome may result in a materially different outcome than the amount included in the tax liabilities.

In addition, the Company recognizes deferred tax assets relating to tax losses carried forward to the extent there are sufficient taxable temporary differences (deferred tax liabilities) relating to the same taxation authority and the same taxable entity against which the unused tax losses can be utilized. However, utilization of the tax losses also depends on the ability of the taxable entity to satisfy certain tests at the time the losses are recouped.

iii) Stock-based compensation

The Company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the share option, volatility and dividend yield and making assumptions about them. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in Note 6.

By a mineral property option agreement dated October 5, 2013 and amended on December 5, 2014, the Company may acquire up to a 100% interest in the Star Property. This property consists of six mineral tenures and is located approximately 80 kilometres west southwest of Quesnel, British Columbia.

In order to earn a 51% interest in the Star Property, the Company shall pay \$78,000 in cash and incur \$885,000 in exploration work as follows:

			E	Exploration	
Date	I	Payment	Work		
Upon completion of \$0.02 financing (Paid) Upon CSE listing date ("Listing Date") (Paid)	\$	2,000 6,000	\$	-

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 12

Note 5 <u>Exploration and Evaluation Assets</u> – (cont'd)

The Company may earn an additional 10% interest in the Star Property by completing a pre-feasibility study and a further 9% interest upon successful completion of a senior financing required to put the Star Property into production. The Company also has the option to purchase 100% of the property for the issuance of 250,000 common shares of the Company at any time up to 12 months from the Listing Date.

Should the Company acquire 100% of the property the optionor will retain a 2% Net Smelter Returns ('NSR') royalty. One half of this royalty may be purchased by the Company at any time prior to the commencement of commercial production for \$500,000.

The Company also agreed to complete sufficient assessment work until the Listing Date, to a maximum of \$5,000 per year, to keep the mineral tenures in good standing.

Prior to October 5, 2013, the date of the option agreement, the Company incurred an aggregate total of \$26,948 in costs related to the evaluation of the Star Property, which have been previously expensed to the Statement of Loss and Comprehensive Loss.

Note 6 Share Capital – Note 5

a) Authorized:

Unlimited common shares without par value

b) <u>Issued</u>:

During the year ended October 31, 2015

On January 16, 2015, the Company issued 252,000 common shares at \$0.05 per share for total proceeds of \$12,600.

On March 13, 2015, shareholders that had paid \$0.005 per share for 5,000,000 common shares, agreed to further capitalize the Company in an additional aggregate amount of \$25,000, pursuant to the requirements of regulatory authorities in connection with the Company obtaining a receipt for the Initial Public Offering ("IPO"). These funds were recorded within the reserve account for accounting purposes.

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 13

Note 6 Share Capital – Note 5 – (cont'd)

b) <u>Issued</u>: – (cont'd)

On March 17, 2015 the Company entered into an agreement with Jordan Capital Markets Inc. (the "Agent") to complete an IPO for the issue of 3,000,000 common shares of the Company at \$0.10 per share for gross proceeds of \$300,000. The Company completed the IPO on June 12, 2015 and paid the Agent a cash commission of \$30,000 and issued to the Agent broker warrants to purchase 300,000 common shares at \$0.10 per share until December 12, 2016. The Company recorded a fair value of the agent's warrants of \$15,000 utilizing the Black-Scholes option pricing model with the following assumptions – Risk-free interest rate of 1%; Dividend yield of Nil; Expected volatility of 100%; Expected life of 1.5 years. The forfeiture rate was 0%.

The Company also paid the Agent a corporate finance fee of \$25,000 plus GST and paid expenses related to the offering, including legal fees and disbursements totalling \$22.763.

Total cost of the offering:

Agent's commission	\$	30,000
Agent's broker warrants		15,000
Corporate finance fee		25,000
Other offering expenses		22,763
	<u>\$</u>	92,763

During the year ended October 31, 2014

On October 14, 2014, the Company issued 13,400,000 common shares at \$0.02 per share for total proceeds of \$268,000.

On October 29, 2014, the Company issued 500,000 common shares at \$0.05 per share for total proceeds of \$25,000.

c) Escrow:

Pursuant to an escrow agreement dated March 12, 2015, 16,500,001 common shares were placed into escrow to be released as to 10% on the Listing Date with the remaining 90% to be released in equal tranches at six-month intervals over the 36 months following the Listing Date.

As at October 31, 2015, there were 12,375,001common shares held in escrow.

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 14

Note 6 Share Capital – Note 5 – (cont'd)

d) Share-based Compensation:

The Company has a share-based compensation plan whereby share purchase options are granted in accordance with the policies of regulatory authorities at an exercise price equal to the market price of the Company's shares on the date of the grant and, unless otherwise stated, vest on the grant date and with a term not to exceed five years. Under the plan, the board of directors may grant up to 10% of the issued number of shares outstanding as at the date of the share purchase option grant.

On January 13, 2015 and January 19, 2015, the Company granted share purchase options to directors of the Company and the exploration manager of the Company entitling the holders thereof the right to purchase up to 1,000,000 and 125,000 common shares, respectively at \$0.12 per share. These options expire on March 31, 2020. The Company recorded a fair value of \$33,750 utilizing the Black-Scholes option pricing model with the following assumptions – Risk-free interest rate of 0.69%; Dividend yield of Nil; Expected volatility of 100%; Expected life of 5.17 years. The forfeiture rate was 0%.

A summary of the Company's share purchase options outstanding at October 31, 2015 are presented below:

are presented below.	<u>Options</u>	Weighted Average Exercise <u>Price</u>
Outstanding and exercisable at October 31, 2013 and 2014 Granted	1,125,000	\$0.12
Outstanding and exercisable at October 31, 2015	1,125,000	\$0.12

As at October 31, 2015, share purchase options outstanding have a weighted average remaining contractual life of 4.42 years.

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 15

Note 6 Share Capital – Note 5 – (cont'd)

e) Agent's Warrants:

A summary of agent's warrants outstanding at October 31, 2015 are presented below:

	Warrants	Weighted Average Exercise <u>Price</u>
Outstanding, at October 31, 2013 and 2014 Issued	300,000	<u>\$0.10</u>
Outstanding, at October 31, 2015	300,000	<u>\$0.10</u>

As at October 31, 2015, agent's warrants have a weighted average remaining contractual life of 1.12 years.

Note 7 <u>Income Taxes</u>

The Company has Canadian exploration and development expenses of approximately \$48,000 (2014: \$18,000) that are available to carry forward and offset future years' income at various rates. These pools carry forward indefinitely.

The Company has non-capital losses of approximately \$133,000 (2014: \$19,000), which may be carried forward to offset future years' income. The non-capital losses expire as follows:

2031	\$	2,000
2032		2,000
2033		1,000
2034		14,000
2035		114,000
	<u>\$</u>	133,000

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 16

Note 7 <u>Income Taxes</u> – (cont'd)

The difference between tax expense for the periods and the expected income taxes based on the statutory tax rate arises as follows:

	<u>2015</u>	<u>2014</u>
Loss before income taxes	\$ (132,085)	\$ (13,526)
Statutory income tax rates	 26.00%	 26.00%
Computed income tax recovery Effect on change in tax rate Permanent difference Changes in unrecognized deferred tax assets	\$ (34,300) - 4,700 29,600	\$ (3,500) (200) - 3,700
Total current and deferred income tax recovery	\$ 	\$ <u> </u>

Effective December 1, 2013, the British Columbia provincial tax rate and the Canadian Federal corporate tax rate remained at 11% and 15%, respectively.

No deferred tax asset has been recognized in respect of the following losses and temporary differences as it is not considered probable that sufficient future taxable profit will allow the deferred tax asset to be recovered:

	<u>2015</u>	<u>2014</u>
Non-capital losses	\$ 34,400	\$ 4,800
Undeducted finance costs	16,200	_
Resource expenditures	3,500	2,400
Unrecognized deferred tax assets	 (54,100)	 (7,200)
Deferred income tax asset, net	\$ 	\$

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 17

Note 8 Financial Instruments and Risk Management

The Company is exposed through its operations to the following financial risks:

Market Risk Credit Risk Liquidity Risk

In common with all other businesses, the Company is exposed to risks that arise from its use of financial instruments. This note describes the Company's objectives, policies and processes for managing those risks and the methods used to measure them. Further quantitative information in respect of these risks is presented throughout these financial statements.

There have been no substantive changes in the Company's exposure to financial instrument risks, its objectives, policies and process for managing those risks or the methods used to measure them from previous years unless otherwise stated in this note.

a) Market Risk:

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices and are comprised of foreign currency risk and interest rate risk.

b) Foreign Currency Risk:

Foreign currency risk is the risk that a variation in exchange rates between the Canadian dollar and other foreign currencies will affect the Company's operations and financial results. The Company does not have significant exposure to foreign exchange rate fluctuation.

c) Interest Rate Risk:

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. Interest rate risk is limited to potential decreases on the interest rate offered on cash and cash equivalents held with chartered Canadian financial institutions. The risk that the Company will realize a loss as a result of a decline in the fair value of the cash equivalents is limited because of the short-term nature of the investments.

d) Credit Risk:

Credit risk is the risk of financial loss to the Company if a customer or a counterparty to a financial instrument fails to meet its contractual obligations. Financial instruments which are potentially subject to credit risk for the Company consists primarily of cash and cash equivalents. Cash and cash equivalents are maintained with financial institutions of reputable credit and may be redeemed upon demand. The Company considers this risk to be minimal.

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 18

Note 8 Financial Instruments and Risk Management – (cont'd)

e) Liquidity Risk:

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company's policy is to ensure that it will always have sufficient cash to allow it to meet its liabilities when they become due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. The key to success in managing liquidity is the degree of certainty in the cash flow projections. If future cash flows are fairly uncertain, the liquidity risk increases. The Company manages liquidity risk through the management of its capital structure (Note 9).

Accounts payable and accrued liabilities and due to related parties are due within the current operating year.

As at October 31, 2015, the Company had working capital of \$412,843. The Company does not currently operate any producing properties and as such, may be dependent upon issuance of new equity to advance its exploration properties. If equity financing is required, failure to obtain financing on a timely basis may cause the Company to postpone exploration plans, reduce or terminate its operations.

Determination of Fair Value:

Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

The financial position carrying amounts for cash and cash equivalents, accounts payable and accrued liabilities and due to related parties approximate fair value due to their short-term nature. Due to the use of subjective judgments and uncertainties in the determination of fair values these values should not be interpreted as being realizable in an immediate settlement of the financial instruments.

Fair Value Hierarchy:

Financial instruments that are measured subsequent to initial recognition at fair value are grouped in Levels 1 to 3 based on the degree to which the fair value is observable:

- Level 1 Applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.
- Level 2 Applies to assets or liabilities for which there are inputs other than quoted
 prices included in Level 1 that are observable for the asset or liability, either directly
 such as quoted prices for similar assets or liabilities in active markets or indirectly
 such as quoted prices for identical assets or liabilities in markets with insufficient
 volume or infrequent transactions.
- Level 3 Applies to assets or liabilities for which there are unobservable market data.

Notes to the Financial Statements October 31, 2015 and 2014 (Stated in Canadian Dollars) – Page 19

Note 9 <u>Management of Capital Risk</u>

The Company manages its cash and cash equivalents, and common shares as capital. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the development of its exploration and evaluation assets and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue new debt, acquire or dispose of assets or adjust the amount of cash and cash equivalents.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions. The annual and updated budgets are approved by the Board of Directors.

In order to maximize ongoing development efforts, the Company does not pay out dividends. The Company's investment policy is to invest its short-term excess cash in highly liquid short-term interest-bearing investments with maturities 90 days or less from the original date of acquisition, selected with regards to the expected timing of expenditures from continuing operations.

Note 10 Related Party Transactions – Note 6

The Company incurred the following expenditures charged by directors of the Company and a spouse of a director of the Company:

		<u>2015</u>	<u>2014</u>
Administrative expenses: Website cost	\$	1,698	\$ -
Key management compensation: Share-based compensation	_	30,000	 <u>-</u>
	<u>\$</u>	31,698	\$

The transactions above are in the normal course of operations and were measured by amounts agreed upon by the transacting parties.

As at October 31, 2015, the Company owed \$Nil (October 31, 2014: \$120) to directors of the Company. These loans were provided to cover monthly bank charges. The amounts owed were unsecured, non-interest bearing and were due on demand.

The Company considers its Chief Executive Officer, Chief Financial Officer and directors of the Company to be key management.
